-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “*discharge gas passage, line between the safety valve and a center of the oil separator... parallel to axes of the screw rotors*” recited in claims 5 and 6, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-4 and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Osumimoto et al. (Osumimoto) (Patent Number 6,506,039).

Regarding claim 1, as shown in Figs. 1, 2A, 3A, 4A and 5A, Osumimoto discloses a screw compressor comprising a casing accommodating therein at least a pair of male and female rotors (6) meshing with each other and bearings, a discharge casing (3) including bearings (12, 13) that support the male and female rotors, a substantially cylindrical-shaped, vertical oil separator (not numbered; however, clearly seen in Figs. 2-5), and an oil reservoir (19) that accumulates therein an oil separated by the oil separator, and wherein the oil separator and the oil reservoir (19) are formed integral with the casing.

Regarding claims 2-4 and 7, Osumimoto further discloses an inner space (4) in the oil separator and the oil reservoir (19) are communicated to each other by at least one or more openings (not numbered; however, clearly seen in Figs. 2-5); the opening or openings being provided at a lower end of the oil separator (19) or in the vicinity of the lower end; the opening or openings being formed so that a width thereof is increased toward an outer peripheral side of the inner space of the oil separator (19 – see Fig. 4A) from a center thereof; the opening or openings defining a part of a lower portion of an oil separation space (4) of the oil separator and

Art Unit: 3748

are formed toward an outer peripheral side of the inner space of the oil separator from a center thereof.

Allowable Subject Matter

3. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claim 6 is allowed.

Prior Art

The IDS (PTO-1449) filed on January 28, 2004 has been considered. An initialized copy is attached hereto.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and consists of six patents: Hida et al. (U.S. Patent Number 6,554,595), Marta Zander (Publication Number DE 641,877), Ishii et al. (Publication Number JP 54-162220), Suga et al. (Publication Number JP 55-117092), Morisawa et al. (Publication Number JP 04-132891), and Watanabe et al. (Publication Number JP 04-153596), each further discloses a state of the art.

Communication

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Theresa Trieu whose telephone number is 571-272-4868. The examiner can normally be reached on Monday-Friday 8:30am- 5:00pm. The new telephone number is 571-272-4868 that will become effective after November 22, 2004.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas E Denion can be reached on 571-272-4859. The new telephone number is
